“NOTHING WITHOUT US: The Women Who Will End AIDS” St. Louis PREMIERE

“NOTHING WITHOUT US” is the first documentary to tell the story of how HIV+ women on two continents turned a devastating diagnosis into a fight for survival and a movement to end a global epidemic. Since the early 90s, AIDS has largely been painted as affecting mainly white, gay males. Rich with stories, facts, and moments of hope, **“Nothing Without Us”** brings light to those who this narrative passes over.
